

Safeplace

Safeplace

- Safeplace is a lasting symbol of security and reliability. At Safeplace, we assume responsibility for the long-term consequences of our activities, from R&D to manufacturing, sales, and service.
- Safeplace is a family of highly committed employees, subcontractors and distributors who share a corporate culture of dedication, respect, and friendly honest relationships both at home and with our customers.
- Safeplace was established in 1946. Since 1987, we are dedicated to providing the best electronic safes to the hospitality industry.
- We service thousands of hotels, cruise ships, hospitals, universities, and institutions in over seventy countries around the world.
- All Safeplace products are manufactured in conformity with the highest international quality assurance standards. We respect the environment and manufacture without child labor or exploitation of the work force.
- Our R&D responds to market needs and transforms these needs into secure, user-friendly products using the most advanced technologies.

THE SAFEPLACE BIMAX CONTROL UNIT

FOOLPROOF SECURITY AT YOUR FINGERTIPS

The BiMax protects management from negligence, misuse or liability claims. It incorporates the most advanced security features on the market.

Highest Security: Each override operation requires the use of a personal password and fingerprint identification which ensures that only authorized users have access.

No Universal Tool: Each unit is factory encrypted for a specific property and will not work anywhere else.

Personal Responsibility: Each operation of the BiMax is recorded in the unit by user I.D., date and time, and room number.

Instant Damage Control: The BiMax is fully programmable. In case of loss, theft, or staff turnover, the user passwords and security parameters can be reprogrammed instantly.

THE SAFEPLACE AUDIT SYSTEM

- Includes two reports: the safe audit report and the BiMax unit self-audit report.
- The report shows the last 120 operations of the safe and the last 160 operations of the control unit.
- The report includes the room number, type of operation, personal I.D., date and time of each operation.
- The audit report can be printed or filed on any P.C.
- The report is immune to power failure and cannot be erased under any circumstances.
